“

Medical Image Processing Market by Application (Cardiology, Gynecology, Breast mammography, Neurology, Oncology, Autoimmune disease), by Technology (CT-Scan, X-ray, Ultrasound, MRI, Nuclear Imaging)”

Allied Market Research

Medical imaging is a technique used for creating the visual representation of the internal body parts for the purpose of clinical analysis and medical intervention. The use of this technique reveals an internal structure that is hidden by the skin and bones for the diagnosis and treatment of disease. The medical imaging technique includes the use of several modern types of equipment such as CT scan, ultrasound, X-ray, MRI, and others. The market for medical imaging processing has witnessed a high growth due to the increasing use of these techniques in the medical diagnosis, disease monitoring, and treatment of disease. The growth would be driven by the increasing government

investment in healthcare infrastructure development. Moreover, the growing awareness about the early diagnosis of disease with the help of the medical imaging process is fuelling the growth of the global medical imaging processing market.

Comprehensive competitive analysis and profiles of major market players, such as

GE Healthcare
Philips Healthcare
Hitachi Medical Corporation
Hologic, Inc.
Siemens Healthcare
Samsung Medison
Shimadzu Corporation
Toshiba Medical Systems Corporation.

KEY BENEFITS

Market analysis based on current market scenario and expected future trends to enable stakeholders to take strategic decisions

Analysis of the factors impacting the market to understand business opportunities

Analysis of the market based on devices and geography as well as forecasts from 2021 – 2030

Identification of key investment pockets for various applications, services, and geographies

Identification of the key players and their strategic moves

Implications of the regulations and reimbursement scenario in diabetes care

Evaluation of market trends to provide deep-dive intelligence into every market segment

Competitive analysis to effectively plan and execute a business plan

Micro-level analysis based on application, service, and geography

Covid-19 Scenario:

1) The Covid-19 pandemic and followed by lockdown has affected several manufacturing industries.

2) The prolonged lockdown resulted in a disrupted supply chain and increased the prices of raw materials.

3) However, as the world has been recovering from the pandemic, the market is estimated to get back on track.
