Most Navy Veterans who develop mesothelioma were initially exposed to asbestos on the navy ship or submarine they were assigned to. Typically, it was their duty station that involved them being exposed to asbestos. However, if while in the navy the Veteran stayed with his ship or submarine at a navy shipyard to assist shipyard workers in repairs or an upgrade to the ship or submarine-they may have had heavy to extreme asbestos exposure. Navy Veterans who now have mesothelioma and who spent time at a shipyard might receive a lot more in compensation
