What is OduwaCoin?

Oduwacoin is an open-source cryptocurrency. The first indigenous Cryptocurrency was designed to empower people of African descent. It is the most viable alternative Cryptocurrency to Bitcoin, a medium of exchange wherein individual coin ownership records are stored in a decentralized ledger using cryptography. Oduwacoin runs on its native blockchain to secure transaction records, control the creation of additional coins, and verify the transfer of coin ownership. The mission of Oduwacoin is to bring indigenous people together using blockchain technology as a medium of exchange for goods and services to empower the people.
