

API Senior Policy Advisor to Speak at Fall Hydrogen & Carbon Capture Conference

PENN VALLEY, PA, US, October 12, 2021 /EINPresswire.com/ -- The use, transport and production of [hydrogen](#) is growing quickly, as companies realize governments and the general public continue their [decarbonization](#) objectives. Low-carbon hydrogen is increasingly recognized as a potential solution for hard to decarbonize or hard to electrify sectors.

Stein's presentation will provide a window into the very strong interest in low carbon hydrogen and carbon capture in Washington,"

Tom Gellrich, Founder, H2-CCS Network

At the U.S. federal government level, there is growing recognition using the universe's most abundant element in generating energy can have tremendous positive attributes.

"From a policy perspective, there is growing recognition by Congress of the importance of low-carbon hydrogen, particularly some bipartisan pieces of legislation that have been introduced," according to Jeff Stein, Senior Policy Advisor at API, the American Petroleum Institute.

Stein will be a featured speaker, addressing the industry embracing hydrogen and carbon capture sequestration at the Nov. 11 Hydrogen & Carbon Capture Conference, at the Hilton Garden Inn Pittsburgh Southpointe. The one-day conference is presented by H2-CCS, ShaleDirectories.com, and TopLine Analytics.

Stein said Republicans and Democrats have shown a great deal of interest in promoting low-carbon hydrogen and CCS, or carbon capture and sequestration.

"Additionally, there is a bipartisan recognition of the need to build out needed low-carbon infrastructure."

"Stein's presentation will provide a window into the very strong interest in low carbon hydrogen and carbon capture in Washington," stated Tom Gellrich, H2-CCS Network Founder.

While the U.S. Department of Energy has been involved with hydrogen research and development, Stein said never before has there been the broad focus on hydrogen/CCS as there is now.
