

Cooling Fabrics Market 2021-26: Size, Share, Trends, Scope, Demand and Future Scope

According to the latest report by IMARC Group, The global cooling fabrics market to grow at a CAGR of around 6% during 2021-2026.

SHERIDAN, WYOMING, UNITED STATE, October 12, 2021 /EINPresswire.com/ -- According to the latest report by IMARC Group "[Cooling Fabrics Market: Global Industry Trends, Size, Share, Growth, Opportunity and Forecast 2021-2026](#)", The global cooling fabrics market exhibited moderate growth during 2015-2020. Looking forward, IMARC Group expects the market to grow at a CAGR of around 6% during 2021-2026.

Cooling fabrics are made using gel, polymer, and phase change materials (PCMs) to offer insulating properties in response to the environment. They absorb heat and moisture and release them into the atmosphere to enhance the breathability and ventilation of the garments. They also aid in maintaining a comfortable body temperature while performing physical activity and improving the overall well-being from scorching conditions. As a result, they find application in the production of sports apparel around the world.

Note: We are regularly tracking the direct effect of COVID-19 on the market, along with the indirect influence of associated industries. These observations will be integrated into the report.

Market Trends:

The outbreak of the contagious coronavirus disease (COVID-19) and the surging need for personal protective equipment (PPE) represents one of the key factors positively influencing the sales of cooling fabrics across the globe. Besides this, cooling fabrics are utilized in heavy protective clothing or armors that are worn by firefighters, military personnel, and staff working with the hazardous material cleanup. Furthermore, due to the rising number of sports enthusiasts, leading manufacturers are providing cooling garments that maximize oxygen uptake, increase blood flow to the working muscles, and minimize the risk of inflammation during events.
