Allied Market Research

Albuterol (brand names Ventolin and Proventalin); Xopenex (levalbuterol); and Combivent, a combination of ipratropium bromide and albuterol, are bronchodilators used to treat bronchospasms caused due to cystic fibrosis. These are being widely used by patients as they suffer from difficulty in breathing due to mucus accumulation.

Significant increase in prevalence of cystic fibrosis, asthma, and other disorders across the globe is the major factor driving the bronchodilators market growth. Furthermore, other major factors driving the market growth are rise in concern regarding respiratory diseases, such as asthma and

sympathomimetics and surge in incidences of respiratory diseases caused due to cigarette smoking. The bronchodilators market is anticipated to grow due to increase in healthcare expenditure, growth in use of homecare devices in the healthcare industry, and rapid adoption of advanced medical solutions. Presently, most healthcare practitioners and pulmonary diseases specialists prefer combination of a drug and a device, owing to its fast and effective outcome. However, the factors such as high cost associated with bronchodilators and side effects caused due to their excessive use hampers the bronchodilators market growth.
