

3D Printing Market Size 2021-2026: Global Industry Trends, Share, Growth, Opportunity and Forecast

Looking forward, IMARC Group expects the market to grow at a CAGR of around 20% during 2021-2026.

SHERIDAN, WYOMING, UNITED STATES, October 13, 2021 /EINPresswire.com/ -- According to IMARC Group's latest report, titled "[3D Printing Market Size: Global Industry Trends, Share, Growth, Opportunity and Forecast 2021-2026](#)", the global 3D printing market reached a value of US\$ 13.2 Billion in 2020.

Three-dimensional (3D) printing is a process wherein materials, such as polymers, metals, and ceramics, are added layer-by-layer to form 3D objects. It relies on a computer-generated design that makes less material wastage and reduces the overall cost of production. Nowadays, it is gaining widespread adoption in the production of intricate designs, such as maquettes and replicating ancient artifacts in archaeology, over conventional printing technologies.

Rising sales of vehicles due to rapid urbanization and increasing spending capacity of individuals represent one of the key factors positively influencing the employment of 3D printing in the automotive industry worldwide. It assists in reducing weight, improving performance, and increasing the fuel efficiency of automobiles. Moreover, it finds application in the healthcare industry for complex bioprinting and producing personalized prosthetics. It is also used in reconstructing bones and body parts in forensic pathology. Apart from this, the escalating demand for personalized consumer products, such as toys, shoes, [decorative](#) items, and jewelry, is anticipated to bolster the market growth. Looking forward, IMARC Group expects the market to grow at a CAGR of around 20% during 2021-2026.

As the novel coronavirus (COVID-19) crisis takes over the world, we are continuously tracking the

changes in the markets, as well as the industry behaviors of the consumers globally and our estimates about the latest market trends and forecasts are being done after considering the impact of this pandemic.

Competitive Landscape:

Stratasys
3D Systems
Materialise
EOS GmbH
Ge Additive
Exone
Voxeljet
HP
SLM Solutions
Envisiontec
Protolabs
Mcor Technologies
Optomec
Groupe Gorgé
Ultimaker
Renishaw
Beijing Tiertime Technology
Xyzprinting

Market Segmentation:

Breakup by Technology:

Stereolithography
Fused Deposition Modeling
Selective Laser Sintering
Electron Beam Melting
Digital Light Processing
Others

Breakup by Process:

Binder Jetting
Directed Energy Deposition
Material Extrusion
Material Jetting
Powder Bed Fusion

Sheet Lamination
Vat Photopolymerization

Breakup by Material:

Photopolymers
Plastics
Metals and Ceramics
Others

Breakup by Offering:

Printer
Material
Software
Service

Breakup by Application:

Prototyping
Tooling
Functional Part Manufacturing

Breakup by End-User:

Consumer Products
Machinery
Healthcare
[Aerospace](#)
Automobile
Others

Breakup by Region:

Europe
North America
Asia Pacific
Middle East and Africa
Latin America

About Us

IMARC Group is a leading market research company that offers management strategy and market research worldwide. We partner with clients in all sectors and regions to identify their highest-value opportunities, address their most critical challenges, and transform their businesses.

IMARC's information products include major market, scientific, economic and technological developments for business leaders in biotechnology, advanced materials, pharmaceuticals, food and beverage, travel and tourism, and nanotechnology industries. We also provide cost model and manufacturing setup project reports through Syndicated Analytics, a subsidiary of IMARC Group.

Our offerings include comprehensive market intelligence in the form of research reports, production cost reports, feasibility studies, and consulting services. Our team, which includes experienced researchers and analysts from various industries, is dedicated to providing high-quality data and insights to our clientele, ranging from small and medium businesses to Fortune 1000 corporations.
