*the global integrated workplace management system market expects to grow at a CAGR of around 12% during the forecast period (2021-2026).*

SHERIDAN, WYOMING, UNITED STATE, October 13, 2021 /EINPresswire.com/ -- According to the latest report by IMARC Group "[Integrated Workplace Management System Market: Global Industry Trends, Share, Size, Growth, Opportunity and Forecast 2021-2026](#)", the global integrated workplace management system market exhibited strong growth during 2015-2020. Looking forward, the market expects to grow at a CAGR of around 12% during the forecast period (2021-2026).

An integrated workplace management (IWM) system stands for a next-generation solution adopted in the workplace for facility management (FM). It supports organizations by enhancing workplace resources, focusing on cost savings and real estate expenditure via corporate real estate management, and managing the portfolio, infrastructure, and assets. This system is primarily used for planning, analyzing the space utility data, and performing essential administrative tasks, like locating employees within an ample office space and assigning a place to new staff.

## Market Trends:

The elevating trend of automation in FM processes to boost business productivity by increasing efficiency, flexibility, transparency, and customer satisfaction is primarily driving the global integrated workplace management system market. Moreover, the growing adoption of digital solutions by the organizations over typical approaches for lease, project, space, asset, facility, and maintenance management is also catalyzing the market growth. Additionally, this system provides several benefits, like real-time tracking, recovery in case of disasters, energy conservation, and consolidation of data centers, thereby acting as another growth-inducing factor. Besides this, the integration of sensors, advanced analytics, and Software as a Service (SaaS) with IWM systems will further augment the market growth in the forecasted period.
