SHERIDAN, WYOMING, UNITED STATE, October 13, 2021 /EINPresswire.com/ -- According to the latest report by IMARC Group "[Veterinary Dental Equipment Market: Global Industry Trends, Share, Size, Growth, Opportunity and Forecast 2021-2026](#)", The global veterinary dental equipment market exhibited moderate growth during 2015-2020. Looking forward, IMARC Group expects the global market to grow at a CAGR of around 6% during the forecast period (2021-2026).

Veterinary dental equipment refers to specialized tools that allow dental professionals for better visual access during an oral examination of animals. Some of the most commonly used veterinary dental equipment includes extraction forceps, probes, curettes, luxators, deciduous elevators, and tartar. They are designed to help veterinary dentists clean, extract, fill, adjust, repair and examine the teeth and gums to identify problems related to animal oral healthcare.

Market Trends:

The growing awareness among pet owners regarding the maintenance and importance of pet oral hygiene and increasing investments by individuals in their pets' health represent the primary factors driving the global veterinary dental equipment market. Besides this, the rising incidences of periodontitis and gingivitis among animals that consist of a wide range of inflammatory conditions that affect the supporting structures of the teeth have also led to the rapid adoption of dental equipment worldwide. Moreover, the development of next-generation veterinary dental equipment technologies, especially for companion animals, is expected to provide a positive outlook to the market in the upcoming years.
