Adhesives and

Adhesives and Sealants Market

sealants are sticking agents employed to attach, bind, and fasten two or more surfaces. They are manufactured using various organic and inorganic compounds, including acrylic-, polyurethane-, and silicone-based materials. Adhesives and sealants have high shear and tensile strength, due to which they are commonly used on metals, wood, glass, and plastics. They also fill the gaps between substrates, which act as a barrier or protective coating, thereby preventing fluid leakage.

As the novel coronavirus (COVID-19) crisis takes over the world, we are continuously tracking the changes in the markets, as well as the purchase behaviours of the consumers globally and our estimates about the latest market trends and forecasts are being done after considering the impact of this pandemic.

Global Adhesives and Sealants Market Trends:

The global adhesives and sealants market is primarily driven by its extensive use in the construction industry for flooring, waterproofing, and plumbing applications. Adhesives and

sealants also find diverse applications in both interior and exterior automotive applications. These binding agents are utilized to replace mechanical fasteners like welds, screws, rivets, gaskets and fasteners. As a result, product manufacturers are introducing lightweight and compact components for use in modern automobiles. Furthermore, with the rising environmental concerns, manufacturers are introducing environment-friendly alternatives, such as water-based adhesives and organic solvents, that exhibit high bonding strength. On account of these factors, the market is expected to grow at a CAGR of 5.6% during 2021-2026.
