Types of Termites in Florida - Termites Treatments in Port St Lucie

Property Owners and Business Owners Should Always be concerned with Termites

This is Termite Season. Combat termites Now.

Termites can ruin a property right out from under the tenants - Get a free termite inspection today

Joe at ProControl Management wants to announce it is termite season and educate the community about the types of termites in Port St Lucie. In St Lucie County, there are three main termites species to look out for: Subterranean termites, Drywood Termites, Dampwood Termites. All three termites require different methods of prevention and treatment. Joe does not recommend do-it-yourself termite solutions for St Lucie. Everyone is urged to get a free termite inspection today.

Property Owners, as well as Business Owners, should always be concerned with the threat of termites in Port St Lucie. Termites can quickly destroy a structure if left untreated. The environment in Port St Lucie for termites to thrive overwhelmingly favors all three types of termite species. The threats come from within the ground, the neighbors house, or swarms from the sky. Termites should not be treated lightly in St Lucie County.
