Impact of COVID-19 on Airport IT Market:

- The emergence of COVID-19 pandemic has severely affected almost all industries across the world. Furthermore, due to lockdown enforcements and restrictions on movements, it emerged that COVID-19 had a negative impact on airport operation mainly affecting their revenue streams. Travel restrictions and border closures had a debilitating impact on the airports and the aviation component of the tourism industry.
- The U.S. and global tech market impacted the growth of the air travel operations and commercial airports, which decreased the market growth by nearly 32.1% in 2021 as compared to previous years, due to which ICT spending in major economies such as the U.S. have declined in the first half of 2021, but is expected to recover in the second half.
