The report will also set forth a path to commercialization of these assets. Crucially, the NI 43-101 report will enable us to further explore utilizing modern exploration methods. The property was a past [gold](#) producer, old workings are found in the property which increase the possibility to succeed as our ability to encounter solid underground evidence of precious metals increases."

Our objective is to locate a multimillion ounce of Gold deposit. The State of Sonora is known to host several of them. We believe that we have the necessary expertise within our team of Professionals to find a Multimillion Ounce Deposit.

With an eye on the future, will also continue gathering additional rights in other locations, as circumstances permit, by expanding our horizons to Central and Northern Sonora too.
