The global food contact paper and board market is primarily being driven by the increasing inclination towards lightweight packaging solutions to minimize storage and transportation costs. Additionally, the growing environmental concerns have led governments of various nations to implement favorable policies to promote contact paper and boards as an alternative for aluminum and plastic packaging materials. Moreover, the increasing awareness regarding health care among consumers has led to a rise in the demand for hygienically packaged food products, which is creating a positive outlook for the market. Looking forward, IMARC Group expects the global food contact paper and board market to grow at a CAGR of around 5% during the forecast period (2021-2026).
