SHERIDAN, WYOMING, UNITED STATES, October 14, 2021 /EINPresswire.com/ --

According to IMARC Group's latest report, titled "[Tube Packaging Market Share: Global Industry Trends, Size, Growth, Opportunity and Forecast 2021-2026](#)", The global tube packaging market exhibited moderate growth during 2015-2020. Tube packaging is a cylindrical or hollow container employed for packaging creams, gels, lotions, and other thick liquids and solids. They provide the contents with an additional layer of protection from sun, abrasion and breakage. Tube packaging is usually processed through

extrusion, slicing, punching and crumpling and can be customized with personalized labels, colors and designs to provide a functional and unique product. It is usually manufactured using plastic, aluminum, and paperboard. As a result, it finds expansive applications among numerous industries, including personal care, pharmaceuticals, cosmetics, chemical, food and beverages, etc.

The global tube packaging market is primarily driven by the rising demand for small-sized packaging solutions for personal care and cosmetic products. Additionally, the growing consciousness among the consumers regarding the hygiene of the products is positively

influencing the demand for tube packaging solutions. Due to the multi-layered barrier structure, tube packaging improves the shelf-life of the product and minimizes exposure to oxygen, light, bacteria and other contaminants. Moreover, several product innovations, such as the launch of novel applicators, brushes, sponge heads, and pump caps, to magnify the ease of application and enhance the user experience, are acting as another growth-inducing factor. Various other factors, including rapid urbanization and escalating expenditure capacities of the consumers, are anticipated to further drive the market growth in the coming years. Looking forward, IMARC Group expects the global tube packaging market to grow at a CAGR of around 6% during the next five years.
