

United States Geopolymer Market Share 2021: Industry Overview, Growth, Trends, Opportunities and Forecast till 2026

Looking forward, IMARC Group expects the global market to continue its robust growth during the forecast period (2021-2026).

SHERIDAN, WYOMING, UNITED STATES, October 14, 2021 /EINPresswire.com/ --

According to IMARC Group's latest report, titled "[United States Geopolymer Market Share](#): Industry Trends, Size, Growth, Opportunity and Forecast 2021-2026", The United States

geopolymer market reached a strong growth in 2020. Geopolymers stand for inorganic ceramic materials that are characterized by networks of mineral molecules connected with covalent bonds. They are widely classified into two major groups, including pure inorganic and hybrid (organic inorganic) geopolymers. At room temperature, geopolymers exhibit an amorphous microstructure that provides high heat resistance and thermal insulation. They are extensively used for manufacturing fire and heat resistant coatings and adhesives, high-temperature ceramics, toxic and radioactive waste encapsulation, etc.

The expanding applications of geopolymers across diverse fields, such as modern inorganic chemistry, physical chemistry, mineralogy, geology, colloid chemistry, etc., are augmenting the market growth in the United States. Additionally, a significant growth in the construction sector, along with the increasing demand for sustainable and eco-friendly building materials, is also propelling the market. Geopolymers have gained prominence as a substitute for Portland cement for the construction of bridges, tunnels, roads, and other civil infrastructure in the country. In the coming years, the rising investments in numerous product innovations are expected to further drive the market for geopolymers in the United States. Looking forward, IMARC Group expects the global market to continue its robust growth during the forecast period

United States Geopolymer Market

(2021-2026).

As the novel coronavirus (COVID-19) crisis takes over the world, we are continuously tracking the changes in the markets, as well as the industry behaviors of the consumers globally and our estimates about the latest market trends and forecasts are being done after considering the impact of this pandemic.

United States Geopolymer Market Segmentation:

Breakup by Application:

- Cement and Concrete
- Furnace and Reactor Insulators
- Composites
- Decorative Artifacts

Breakup by End Use Industry:

- Building Construction
- Infrastructure
- Industrial
- Art and Decoration
- Others

Breakup by Region:

- Northeast
- Midwest
- South
- West

About Us

IMARC Group is a leading market research company that offers management strategy and market research worldwide. We partner with clients in all sectors and regions to identify their highest-value opportunities, address their most critical challenges, and transform their businesses.

IMARC's information products include major market, scientific, economic and technological developments for business leaders in biotechnology, advanced materials, pharmaceuticals, food and beverage, travel and tourism, and nanotechnology industries. We also provide cost model and manufacturing setup project reports through Syndicated Analytics, a subsidiary of IMARC Group.

Our offerings include comprehensive market intelligence in the form of research reports, production cost reports, feasibility studies, and consulting services. Our team, which includes experienced researchers and analysts from various industries, is dedicated to providing high-quality data and insights to our clientele, ranging from small and medium businesses to Fortune 1000 corporations.
