A transdermal drug delivery system is an alternative system of delivering drugs by utilizing medicated adhesive patch placed on the skin to deliver specific medication directly into the bloodstream through the skin. It acts as an effective alternative to oral intravascular, subcutaneous, and transmucosal routes. For instance, transdermal drug delivery devices such as patches are used in insulin delivery to a [diabetic](#) patient. In recent years, the transdermal drug delivery system has gained popularity as it enables a steady [blood](#) level profile, resulting in reduced systemic side effects and improved efficacy over other dosage forms.

The market is primarily driven by the rapid rise in the geriatric population and the increase in the number of patients suffering from chronic disorders. In addition, the growing cases of diseases where conventional drug delivery systems have lower potency due to hepatic first-pass metabolism necessitate transdermal drug delivery systems. Besides this, the increasing adoption of third-generation transdermal drug delivery systems, including iontophoresis, is also propelling

the market growth. Furthermore, the introduction of new adhesives, molecular absorption and penetration enhancers are improving skin permeability, which is creating new opportunities for delivering drugs through transdermal routes, fueling the market growth across the globe.

Transdermal Drug Delivery Systems Market 2021-2026 Competitive Analysis and Segmentation:

Competitive Landscape with Key Players:

The competitive landscape of the global transdermal drug delivery systems market has been studied in the report with the detailed profiles of the key players operating in the market.

Some of these key players include:

3M Company  
Acrux Limited  
Boehringer Ingelheim International GmbH  
Hisamitsu Pharmaceutical Co. Inc.  
Lavipharm S.A.  
LEAD CHEMICAL Co. Ltd.  
Luye Pharma Group  
Nutriband Inc.  
Viatris Inc.

Key Market Segmentation:

The report has segmented the global transdermal drug delivery systems market on the basis of technology, application and region.

Breakup by Technology:

Electroporation  
Radiofrequency  
Iontophoresis  
Microporation  
Thermal  
Mechanical Arrays  
Ultrasound  
Others

Breakup by Application:

Central Nervous System  
Pain Management

Cardiovascular  
Hormone  
Others

Breakup by Region:

North America  
Asia-Pacific  
Europe  
Latin America  
Middle East and Africa

Key highlights of the report:

Market Performance (2015-2020)  
Market Outlook (2021-2026)  
Industry Trends  
Market Drivers and Success Factors  
The Impact of COVID-19 on the Global Market  
Value Chain Analysis  
Structure of the Global Market  
Comprehensive mapping of the competitive landscape

If you need specific information that is not currently within the scope of the report, we will provide it to you as a part of the customization.
