The global OpenStack service market is primarily driven by their growing adoption of cloud-based services across various organizations. These services provide a framework for organizing and managing cloud-based infrastructure, web hosting, and SaaS (software-as-a-service) delivery. Furthermore, OpenStack services offer various advantages, such as cost savings, customization, value-added services, and innovation in the product line, which are positively influencing the market growth. Besides this, the market is increasingly gaining traction due to the free availability of the platforms, ease of setup, and widespread adoption of big data analytics across small and medium-sized businesses (SMEs). Moreover, technological advancements have increased the capacities for heterogeneous enterprises by providing better speed and developer experience. These factors are expected to provide a positive outlook to the market in the upcoming years. Looking forward, IMARC Group expects the market to grow at a CAGR of 27.4% during 2021-2026.
