Lobsters are marine creatures belonging to the crustacean family, with long cylindrical bodies and joint legs. Their hard, greenish, or brownish, chitinous exoskeletons turn red upon cooking. Lobsters are a rich source of numerous essential nutrients, such as copper, zinc, phosphorous, omega-3 fatty acids, magnesium, vitamins E and B12, etc. As a result, lobsters help in preventing thyroid dysfunction, reducing inflammation, boosting metabolism, improving cognition ability, etc.

The increasing consumer inclination towards a protein-rich diet, including seafood variants, is currently driving the demand for lobsters in the United States. Furthermore, the rising availability of canned, frozen, and processed product variants at accessible prices across retail stores is acting as another key growth-inducing factor. Apart from this, the increasing penetration of cross-continental food trends and growing adoption of lobsters for preparing

exotic cuisines are also bolstering the product demand. Additionally, the expanding hospitality sector is further catalyzing the consumption of lobsters across restaurants and hotels in the United States, which will further continue to drive the market growth in the coming years.

United States Lobster Market 2021-2026 Competitive Analysis and Segmentation:

Competitive Landscape with Key Players:

The competitive landscape of the united states lobster market has been studied in the report with the detailed profiles of the key players operating in the market.

Key Market Segmentation:

The report has segmented the united states lobster market on the basis of product, technology, end use and region.

Breakup by Species:

- American Lobster
- Spiny Lobster
- Rock Lobster
- European Lobster

Breakup by Weight:

- 5 – 0.75 lbs
- 76 – 3.0 lbs
- Over 3 lbs

Breakup by Product Type:

- Whole Lobster
