Europe Digital Therapeutics Market by Application (Diabetes, Obesity, Cardiovascular Disease (CVD), Central Nervous System (CNS) Disease, Respiratory Disease, Smoking Cessation)”

Allied Market Research

Digital therapeutics is a subset of digital health, which delivers evidence-based therapeutic interventions to patients by software programs and devices to manage, prevent, and treat medical disorders. It utilizes digital and online health technologies to treat medical and psychological conditions. In addition, software applications help patients and physicians to track health data by tracking patient behavior. Moreover, digital therapeutics provides remote monitoring to improve long-term health problems. According to European Chronic Disease Alliance

(ECDA), 85% of deaths in the European Union (EU) occur due to chronic diseases, including cardiovascular disease, cancer, diabetes, chronic respiratory disease, and mental illness. In

addition, these chronic illnesses cost European economy around \$124 billion a year. Whereas, digital therapeutics helps in lowering these healthcare costs. Moreover, digital therapeutics products can drive down a company's health care costs by lowering usage of health insurance plans for acute problems.
