“

Neutropenia Treatment Market by Treatment (Colony-stimulating factors, Antibiotics, Antifungals, and Antivirals), & Distribution Channel (Hospital Pharmacies, Retail Pharmacies, & Online Pharmacies)”

*Allied Market Research*

Neutropenia is a disease in which the amount of white blood cells (neutrophils) in the blood supply is decreased, reducing the capacity of the body to combat infections. Neutropenia is defined as an absolute count of neutrophils (ANC) below 1500 per microliter (1500/microL); severe neutropenia is defined as an ANC below 500/microL.

Neutrophils play an important role in immune defenses because they ingest, kill, and digest

invading microbes such as fungi and bacteria. Neutropenia is a disease associated with low white blood cell count. These white blood cells are called neutrophils. Further, some of the major causes for neutropenia are cancer chemotherapy, radiation therapy stem cell, or bone marrow transplants. The treatment for neutropenia is dependent on the underlying cause, severity, and associated infections related to overall health of patients.

The neutropenia market is expected to register a substantial growth in the future, owing to rise in incidences of cancer cases. In addition, increase in R&D efforts by companies to develop novel therapies for treatment of neutropenia is expected to boost the market growth during the forecast period.
