

Enteral Feeding Devices Market Ready to Pack Big Investors by 2027, How?

Surge in number of patients suffering from chronic diseases across the globe drives the growth of the global enteral feeding devices market.

PORTLAND, OR, UNITED STATES, October 14, 2021 /EINPresswire.com/ -- Surge in number of patients suffering from chronic diseases such as neurological disorders and cancer, and growing adoption of enteral nutrition drive the growth of the global enteral feeding devices market.

However, accidental disabilities caused due to inadvertent dislodgment of tubes restrain the market growth. Furthermore, development of advanced feeding devices with lesser side effects is expected to provide new growth opportunities for the market player in near future.

“

Europe contributed the highest share in 2019, and will maintain its dominance throughout the forecast period.”

Allied Market Research

global enteral feeding devices market generated \$2.82 billion in 2019, and is estimated to reach \$4.42 billion by 2027, registering a CAGR of 5.5% from 2020 to 2027. The report offers an extensive analysis of changing market dynamics, key winning strategies, business performance, major segments, and competitive scenarios.

Covid-19 scenario:

- Enteral feeding devices manufacturing and distributing procedures have been affected to a limited extent due to disrupted supply chain amid lockdown.

- The demand for enteral feeding devices has been surged due to Covid-19 pandemic outbreak to improve patient care and to provide added nutritional support to patients affected by the corona virus.

The report offers a detailed segmentation of the global enteral feeding devices market based on type, age group, end-user, application, and region.

Based on type, the enteral feeding pumps segment contributed to the largest share in 2019, accounting for more than one-third of the total share, and is estimated to maintain its dominant position during the forecast period. In addition, it is estimated to portray the highest CAGR of 6.3% during the forecast period. The report also analyzes the single mode segment.

Based on age group, the adults segment accounted for the largest share in 2019, holding nearly three-fifths of the total share, and is expected to maintain the largest share throughout the forecast period. However, the pediatrics segment is expected to register the highest CAGR of 6.0% from 2020 to 2027.

Based on region, Europe contributed the highest share, accounting for around one-third of the total market share in 2019, and will maintain its dominance throughout the forecast period. However, Asia-Pacific is expected to grow at the highest CAGR of 6.2% from 2020 to 2027.
