

## New Study Underlines Significance of Damiva's Quest to Fight Body Pollution

*People with the highest amounts of phthalates have a 48% increase in mortality. Damiva pledges to keep these toxic chemicals out of formulations, forever.*

TORONTO, ONTARIO, CANADA, October 25, 2021 /EINPresswire.com/ -- The latest study of over 5,000 men and women in the U.S. between the ages of 55 and 64 provides further evidence that phthalates are polluting bodies and leading to 48% increase in risk of death. "Everywhere" and "forever" chemicals are unfortunately here to stay including in the environment and people's bodies. [Damiva, the Always 100% Natural™](#) product company, commits to developing products that will not contribute to the chemical overload crisis.

The logo for "Always 100% Natural". The word "ALWAYS" is in a bold, black, sans-serif font at the top. Below it, "100%" is written in a very large, thick, black, hand-drawn style font. At the bottom, the word "NATURAL" is in a bold, black, sans-serif font, similar to "ALWAYS".

**ALWAYS**  
**100%**  
**NATURAL**

Always 100% Natural

Toxic chemicals in consumer products are ubiquitous and difficult to excrete once ingested or absorbed through skin. The [new data from](#) Dr. Leonardo Trasande of NYU Langone Health demonstrates that there is an association between high levels of phosphates in urine and early death, leading to approximately 100,000 premature deaths in the U.S. on an annual basis.

"The issue is," says Annette Garcea, Health & Wellness Lead at Damiva, "that the climate change and body pollution crises are linked. These chemicals we are using are not only polluting our environment, they are also staying in our bodies and making us sick."

Free of chemical preservatives, foaming agents and stabilizers - such as phthalates, sulfates, sulfides and glycerin - and also free of fragrances, Damiva's patented processes for developing and manufacturing chemical-free products includes removing water that provides the basis for

bacterial growth.

“We are on a quest to [fight body pollution](#) by developing 100% natural fem care and skin care products that can be used by women at any stage of life,” says Chia Chia Sun, CEO of Damiva. “We want to be a significant part of the solution to removing the toxic chemical overload that women are experiencing from their consumer products.”

To learn more about how Damiva is leading in combatting body pollution, watch this video:
