There is currently a growing prevalence of chronic and lifestyle diseases across the globe. This, along with the rising health consciousness among the masses, represents one of the key factors bolstering the growth of the market. Lignans aid in softening and moisturizing the skin and preventing dull complexion, dryness, and rough skin. As a result, leading manufacturers are widely employing lignans for the manufacturing of shampoos, moisturizers, and anti-aging products. They are also increasingly being utilized to produce drugs for treating acquired immunodeficiency syndrome (AIDS) due to their antiviral properties. This is anticipated to propel market growth. Looking forward, IMARC Group expects the global lignans market to exhibit moderate growth during the next five years.
