Phytosterols, also referred to as plant sterols, are a family of naturally occurring compounds that are usually found in unrefined vegetable oils, whole grains, seeds, nuts, and legumes. Phytosterols are widely consumed to block the absorption of cholesterol in the digestive system. The most common types of phytosterols which can be consumed in the human diet are beta-sitosterols, campesterols, stigmasterols, etc. Beta-sitosterols are used for lowering cholesterol levels and stigmasterols have the potential to reduce the risk of cardiovascular diseases. Furthermore, phytosterols also find extensive applications across diverse industries, such as food processing, pharmaceuticals, cosmetics, etc.

The increasing prevalence of numerous cardiovascular disorders due to sedentary consumer lifestyles and unhealthy <u>dietary</u> patterns is augmenting the demand for phytosterol-rich diet. Furthermore, rising consumer inclination towards nutraceuticals and dietary supplements rich in phytosterols is also catalyzing the market growth. Moreover, growing concerns towards the negative health impact of chemical-based ingredients have led to the increasing demand for

phytosterols as a natural food additive. Additionally, the emergence of healthier dark chocolate variants that contain a high amount of phytosterols for reducing cholesterol levels in an individual is further propelling the market growth.

Phytosterols Market 2021-2026 Competitive Analysis and Segmentation:

Competitive Landscape with Key Players:

The competitive landscape of the global phytosterols market has been studied in the report with the detailed profiles of the key players operating in the market.

Some of these key players include:

Arboris

Archer Daniels Midland

BASE

Cargill

Cognis

Lipofoods

Matrix Fine Sciences

Pharmachem Laboratories Inc

Raisio Group

Unilever

Key Market Segmentation:

The report has segmented the global phytosterols market on the basis of product type, application and region.

Breakup by Product Type:

Beta-Sitosterols Campesterols Stigmasterols Others

Breakup by Application:

Food Ingredients Pharmaceuticals Cosmetics Others

Breakup by Region:

Europe North America Asia Pacific Latin America Middle East and Africa
