

Indoor Flooring Market Growth Registering a CAGR of 5.7% to Reach \$189.5 Billion by 2027

Growth of the indoor flooring market is majorly driven by urbanization in developing countries and sustainable products.

PORTLAND, OR, UNITED STATES,
October 18, 2021 /EINPresswire.com/ --

The [indoor flooring market](#) size accounted for \$142.4 billion in 2019, and is expected to reach \$189.5 billion by 2027, registering a CAGR of 5.7% from 2020 to 2027. In 2019, the ceramic tiles segment dominated the indoor flooring market, followed by the carpet flooring segment. The indoor flooring market includes revenue generated by flooring products used for building floors for new construction and renovation of residential, commercial and industrial infrastructures. These products are available in wide range of material, shape, size and color.

Low cost production of advanced indoor flooring products and easy installation process has led to rise in demand especially in developing countries. In addition, large scale new construction in developing countries and renovation in developed countries is another factor that is driving the indoor flooring market. However, global trade war has directly affected the cost of raw products as well as finished products. In addition, outbreak of COVID-19 has led to halt in construction and manufacturing activities across the globe.
