SHERIDAN, WYOMING, UNITED STATES, October 19, 2021 /EINPresswire.com/ -- Market Overview:

According to the latest report by IMARC Group, titled "Air Purifier Market: Global Industry Trends, Share, Size, Growth, Opportunity and Forecast 2021-2026," the global [air purifier](#)

[market size](#) exhibited moderate growth during 2015-2020. On account of the aforementioned factors, the market is expected to grow at a CAGR of 8% during 2021-2026.

Air purifiers are generally used to eliminate contaminating particles that are present in the air, including dust, dander and pollen. These devices are beneficial for individuals suffering from allergies and asthma. Since they are commonly available in distinctive designs, shapes and colors through online and offline organized retail channels, this is positively influencing the market growth.

We are regularly tracking the direct effect of COVID-19 on the market, along with the indirect influence of associated industries. These observations will be integrated into the report.

Global Air Purifier Market Trends:

The global market is primarily driven by a considerable rise in the prevalence of airborne diseases, coupled with the increasing levels of air pollution and the rising incidences of chronic

respiratory diseases across the globe. This is supported by rapid urbanization, the changing lifestyle preferences of the masses and their inflating disposable income levels, which is providing a boost to the sale of air purifiers across the globe. Furthermore, the widespread integration of advanced and innovative features, including electrostatic precipitators and ozone generators, with air purifiers is contributing to the market growth further.
