Aircraft line maintenance refers to the process of repairing, modifying and inspecting an aircraft. It includes scheduled and unscheduled services, defect rectification, line station setup and component replacement and rigging of the engine and auxiliary power unit (APU). These maintenance activities are generally performed to maintain the aircraft system and structure in flightworthy conditions. They are usually conducted outside the hangar while the aircraft is on the ground and is preparing for flight. Aircraft line maintenance aids in ensuring enhanced safety, performance, reliability and cost-effectiveness.

The global aircraft line maintenance market is primarily being driven by significant growth in the aviation industry. Furthermore, the rising need for enhanced safety, security and wellbeing of passengers and crew is favoring the market growth. Various technological advancements, such as the integration of the Internet of Things (IoT) and artificial intelligence (AI) solutions to identify

defects, reduce mishaps and improve the overall efficiency of the aircraft, are providing a thrust to the market growth. Other factors, including the increasing deployment of military aircraft due to rising concerns for national security, along with the strict implementation of various government initiatives regarding passenger safety, are creating a positive outlook for the market.

## Aircraft Line Maintenance Market 2021-2026 Competitive Analysis and Segmentation:

### Competitive Landscape With Key Players:

The competitive landscape of the global aircraft line maintenance market has been studied in the report with the detailed profiles of the key players operating in the market.

Some of these key players include:

AMECO  
ANA Line Maintenance Technics  
Avia Solutions Group  
BCT Aviation Maintenance  
British Airways  
Delta Air Lines  
HAECO  
Lufthansa  
Monarch Aircraft Engineering  
Nayak Group  
SAMCO Aircraft Maintenance  
SIA Engineering Company  
SR Technics  
STS Aviation Group  
Turkish Airlines

### Key Market Segmentation:

The report has segmented the global aircraft line maintenance market on the basis of service, type, aircraft type, technology and region.

### Breakup by Service:

Component Replacement & Rigging Service  
Engine & APU Service  
Line Station Setup & Management Service  
Defect Rectification Service  
Aircraft on Ground (AOG) Service

## Breakup by Type:

- Transit Checks
- Routine Checks

## Breakup by Aircraft Type:

- Narrow Body Aircraft
- Wide-Body Aircraft
- Very Large Body Aircraft
- Others

## Breakup by Technology:

- Traditional Line Maintenance
- Digital Line Maintenance

## Breakup by Region:

- North America
- Asia Pacific
- Europe
- Latin America
- Middle East and Africa

## Key highlights of the report:

- Market Performance (2015-2020)
- Market Outlook (2021-2026)
- Industry Trends
- Market Drivers and Success Factors
- The Impact of COVID-19 on the Global Market
- Value Chain Analysis
- Structure of the Global Market
- Comprehensive mapping of the competitive landscape

If you need specific information that is not currently within the scope of the report, we will provide it to you as a part of the customization.

## About Us

IMARC Group is a leading market research company that offers management strategy and market research worldwide. We partner with clients in all sectors and regions to identify their highest-value opportunities, address their most critical challenges, and transform their businesses.

IMARC's information products include major market, scientific, economic and technological developments for business leaders in pharmaceutical, industrial, and high technology organizations. Market forecasts and industry analysis for biotechnology, advanced materials, pharmaceuticals, food and beverage, travel and tourism, nanotechnology and novel processing methods are at the top of the company's expertise.
