The report provides a detailed analysis of changing market dynamics, top segments, value chain, key investment pockets, regional scenario, and competitive landscape.

Skin Antiseptic

“

Skin Antiseptic Market by  
Ingredients Type (Alcohols,  
Chlorhexidine, Iodine,  
Octenidine),by Formulation  
(Solutions, Cream, Spray,  
Soaps, Swab Sticks, &  
Wipes),by Application  
(Surgeries and Injections)”  
*Allied Market Research*

Skin antiseptic impedes the growth of microorganisms on the skin. These are more regularly used to lessen the risk of infection during surgery and other procedures, hand washing, and skin treatment, to decrease the risk of infections in burns, wounds, and minor cuts, in hospitals & other medical settings. Numerous skin antiseptic products with different active ingredients are being used; some of them are approved, and some are under strict examination due to safety concerns. To keep people and non-living things free of germs, the infection control method is a crucial part.

Comprehensive competitive analysis and profiles of major market players, such as

3M Company, BD, Johnson & Johnson Services, Inc., Reckitt Benckiser, B. Braun Melsungen AG, Purdue Pharma L.P., EcoLab, Schülke & Mayr GmbH, and PSK Pharma Pvt. Ltd.

### COVID-19 Impact analysis

COVID-19 is an infectious disease that originated in the Hubei province of the Wuhan city in China in late December. The highly contagious disease, caused by a virus, severe acute respiratory syndrome coronavirus 2 (SARS-CoV-2), is transmitted from human to human. Since the outbreak in December 2019, the disease has spread to almost 213 countries around the globe with the World Health Organization declaring it a public health emergency on March 11, 2020.

Pharmaceutical and biotech companies together with governments around the globe are working to address the COVID-19 outbreak, from supporting the development of vaccines to planning for medicine supply chain challenges. Currently, around 115 vaccine candidates and 155 molecules are in the R&D pipeline. Moreover, commonly used drugs such as Hydroxychloroquine have witnessed a dramatic surge in demand for the management of COVID-19. Such high demand for these drugs has presented huge opportunities for manufacturers of COVID-19 management drugs, as many developed countries are facing shortages of these drugs. Thus, the pharmaceutical and biotechnology industry is expected to witness significant growth in the future owing to the demand for vaccine and treatment drugs for COVID-19. This in turn is expected to have a significant impact on the skin antiseptic market.
