Lecithin is a fatty substance that is necessary for the cells of the body. Lecithin can be found in many food products, including soybeans and egg yolks. It is taken as a medicine and is also utilized in the manufacturing of medicines. Furthermore, it is used for treating memory disorders such as Alzheimer’s disease and dementia. It is also benefited from treating liver disease, gallbladder disease, some types of depression, anxiety, high cholesterol, and a skin disease called eczema. Lecithin also helps as an ingredient in some eye medicines. This helps keep the medicine in contact with the eye’s cornea. This is converted into acetylcholine, a substance that transmits nerve impulses.
