Although plastic screw closures and peel-off foils are widely used for packaging beverages & foods due to their ease of use and protective properties, manufacturers are expected to switch towards other options as metal screw closures and easy-open cans due to decrease in their prices and weight coupled with the development of better recyclable procedures.

The global caps and closures market for food and beverages is projected to account for \$56,057 million, registering a CAGR of 5.3% from 2016 to 2022. Increase in demand for packaging industry and upsurge in demand for plastic caps and closures have increased the adoption of caps and closures in the food & beverages industry. However, fluctuating prices of raw material hamper the market growth. Furthermore, the development of eco-friendly caps and closures is expected to offer lucrative growth opportunities to the market in the future.

Based on product type, the beverage caps and closures segment contributed the highest revenue in 2015, accounting for three-fifths share of the total revenue. Moreover, the food caps and closures segment accounted for two-fifths share of the overall revenue in 2015. Increase in demand for packaged foods & beverages and improvement in lifestyle are some of the key growth factors of the caps and closures market for food & beverages applications.
