

# Mobile C-Arms Market Top Countries Data, Company Overview, Regional Economy, Development and Forecast to 2027

*The growth of the market is attributed to the growing technological advancements in imaging capabilities and rising incidence of chronic diseases*

VANCOUVER, BC, CANADA, October 20, 2021 /EINPresswire.com/ -- The global [Mobile C-Arms Market](#) will be worth USD 1.61 billion by 2027, according to a current analysis by Emergen Research. The increasing emergence of chronic diseases over the recent past that need early assessment and on-time

diagnosis for prevention of complications is mainly stimulating the growth of the market. The report strives to offer authentic information about the Mobile C-Arms market size, share, product portfolio, revenue estimations, and growth rate. The report further provides a comprehensive analysis of the competitive landscape and provides complete coverage with regard to company profiles, product portfolio, revenue generation, financial standing, and market position.

Moreover, the growing number of road accidents which often leads to orthopedic injuries are fueling the demand for all kinds of mobile c-arm devices. Additionally, the rise in geriatric population, advancements in technology across various regions as well as the rising inclination towards minimally invasive surgical procedures are also stimulating the market growth. Over the recent past, competition among the major players across the globe has intensified mainly in the private sector which has made private hospitals emphasize on technological advancements. Hence, usage of mobile c-arms for orthopedic surgeries, like repositioning of dislocated bone fragments as well as placement of pedicle screws in the spine lead to the growing demand of the technology.
