

# Expansion of Paper and Pulp Industry to Fuel Demand for Froth Flotation Chemicals : Report Fact.MR

*Global froth flotation chemicals market is expected to exhibit a CAGR of above 2% during the forecast period 2020-2030*

ROCKVILLE, MARYLAND, UNITED STATES, October 21, 2021 /EINPresswire.com/ -- With the COVID-19 pandemic causing significant disruptions in the mining sector, growth registered by the froth flotation market is likely to be compromised. The [Froth Flotation Chemicals market](#) faces significant challenges ahead, as end users including mining, paper & pulp, industrial waste and sewage treatment among others continue to reel under the impact of the pandemic. Sluggish growth will remain constant in 2020. However, it is likely to recover from this temporary period of lull as soon as mining activities and operations across other industries resume in full capacity. The report examines evolving trends across end-use markets to present refined forecasts on the froth flotation chemicals market for the period of 2020 to 2030.

## Key Takeaways from [Froth Flotation Chemicals Market Report](#)

The demand from Asia Pacific will continue to rise, driven by surging mining activities besides expansion of paper & pulp and other industries

China will emerge as one of the leading consumers of froth flotation chemicals in Asia Pacific, backed by the country's increasing mining operations

Mining will remain the leading end user of froth flotation chemicals market and is expected to continue dominating the market through the forecast period

Collectors are projected to be remain the more commonly used reagent types in the market

Surging Mining Activities to Propel Growth

Froth flotation will remain highly sought-after as one of the key steps that go in the extraction of sulfide ores. The process makes it extraction of precious metals from even low quality ores simpler and more efficient. The demand for froth flotation minerals is forecast to surge in response to the increasing investment in mining activities. Besides this, surging demand for recycled paper is expected to create lucrative prospects for growth in the market. Considering

this, increasing production of paper and paperboard is likely to create growth opportunities for the froth flotation chemicals market in the coming years.

## Froth Flotation Chemicals Market: Segmentation

Fact.MR's research study assesses the global froth flotation chemicals market in terms of grade, application and region. This report presents extensive market dynamics and trends associated with different segments of the market and their influence on the growth prospects of the global froth flotation chemicals market.

### End-use Industry

- Mining
- Pulp and Paper
- Industrial Waste and Sewage Treatment
- Other End-use Industries

### Reagent Type

- Collectors
- Modifiers
- Frothers
- Other Reagent Types

### Region

- North America
- Europe
- Asia Pacific
- Middle East & Africa
- South America

## Increase in Mining Activities Expected to Boost Market Growth

Mining industry is the leading end user of froth flotation chemicals. The growth of mining industry thus impacts the froth flotation market directly. Various minerals are extracted using

froth flotation method. Some of them are feldspar, quartz, calcite, potash, barite, phosphate and fluorspar among many others.

Countries in Asia such as China and India are witnessing a significant growth in the mining industry. This growth is expected to reflect in the growing demand for froth flotation chemicals in the region. Apart from Asia Pacific, North America is expected to see a rise in mining activities throughout the forecast period 2020-2030. This will bode well for the market in the coming years.

#### Expansion of Paper and Pulp Industry to Fuel Demand

Paper and pulp is one of the largest industries currently, with a volume of around 500 million tons. With rising concerns regarding environmental safety across the world, recycling of paper is gaining popularity. To reduce deforestation and its harmful impacts on the climate, paper and pulp recycling is being carried out extensively across the world.

This rising focus on recycling of paper and pulp is fueling the demand for froth flotation chemicals, as froth flotation is one of the most widely used methods for recycling paper. Froth flotation chemicals assist in extraction of hydrophobic pollutants from recycled material in order to provide fresh material in a process called deinking.

The Froth Flotation Chemicals Market research answers important questions, including the following:

Why Froth Flotation Chemicals Market players are focusing on the business expansion in region?

Which regulatory authorities have granted approval to the application of Froth Flotation Chemicals Market

What are the pros and cons of the Froth Flotation Chemicals Market the environment?

Why players are targeting the production of segment?

What are the strategies implemented by emerging players in the global Froth Flotation Chemicals Market?

The Froth Flotation Chemicals Market report serves the readers with the following data:

In-depth analysis of supply-side and demand-side trends.

Direct and indirect impacts of the growth of relevant markets on the Froth Flotation Chemicals Importance of segment in various regions.

Accurate Y-o-Y growth of the global Froth Flotation Chemicals

Consumption trends among individuals across the globe.

## Froth Flotation Chemicals Market: Competitive Landscape

The market is highly consolidated. Players in the global froth flotation chemicals market are looking at collaborations and partnerships as key strategies in order to gain edge over competition.

Also, technological advancements are something that companies are relying on to gain market advantage.

Some of the key players in the global froth flotation chemicals market are Air products and chemicals, Akzo Nobel NV, ArrMaz products LP, Ashland, BASF SE, Clariant, Cheminova AS, Chevron Phillips Chemical Co. LLC, , Huntsman International LLC, Kemira and Nasaco International LLC are some of the leading companies in the market.

## More Valuable Insights on Froth Flotation Chemicals Market

In its latest report, Fact.MR has provided an unbiased analysis on the global froth flotation chemicals market, comprising data on historical statistics (2015-2019) and forecast of demand for the period between 2020 and 2030. The report discusses critical insights on the froth flotation chemicals market in terms of end user industry(mining, pulp and paper, industrial waste and sewage treatment and other end user industries), in terms of reagent types (collectors, frothers, modifiers and other reagent types ) and across five key regions (North America, Latin America, Europe, Asia Pacific & Middle East & Africa).

## Why choose Fact.MR?

We carry immense pride in saying that our work is recognized by 150+ countries worldwide. Our experience is conveyed by the fact that we have published 6, 000+ reports, thanks to our dedicated team of professionals. With digital intelligence solutions, we support our clients in

remaining at the driver's seat. Our crew of 300+ analysts are available 24/7 to offer dynamic updates regarding various verticals and companies.

#### About Us:

Market research and consulting agency with a difference! That's why 80% of Fortune 1,000 companies trust us for making their most critical decisions. While our experienced consultants employ the latest technologies to extract hard-to-find insights, we believe our USP is the trust clients have on our expertise. Spanning a wide range – from automotive & industry 4.0 to healthcare & retail, our coverage is expansive, but we ensure even the most niche categories are analyzed. Our sales offices in United States and Dublin, Ireland. Headquarter based in Dubai, UAE. Reach out to us with your goals, and we'll be an able research partner.
