The escalating demand for ready-to-drink (RTD) beverages, due to the sedentary lifestyle of working individuals, is driving the China non-alcoholic beverages market. The increasing prevalence of various chronic diseases, such as cardiac arrest, cirrhosis, and neurological dysfunction, has created a consumption shift towards non-alcoholic drinks across the country. In line with this, there has been an emerging demand for vegan, gluten-free, and lactose-free non-alcoholic beverage variants due to the rising adoption of veganism and increasing health consciousness among consumers, which is further fueling the market growth. Looking forward, IMARC Group expects the China non-alcoholic beverages market to grow at a CAGR of around 6% growth during the forecast period (2021-2026).
