

Aggregates Market Growth, Upcoming Trends, Companies Share, Structure and Regional Analysis by 2021-2026

Looking forward, IMARC Group expects the market to exhibit moderate growth during 2021-2026.

SHERIDAN, WYOMING, UNITED STATES, October 21, 2021 /EINPresswire.com/ --

According to IMARC Group's latest report, titled "[Aggregates Market Growth](#): Global Industry Trends, Share, Size, Opportunity and Forecast 2021-2026" the global aggregates market grew at a CAGR of around 6% during 2015-2020. Aggregates are building construction materials mixed with bitumen, lime, cement and gypsum. These materials have a coarse and grainy texture with excellent durability, chemical resistance and the ability to withstand high temperatures. Nowadays, aggregates have gained traction as they offer enhanced porosity, volume, stability, abrasive power, and resistance to wear and erosion to industrial, commercial and residential complexes.

The global aggregates market is primarily driven by rapid industrialization and urbanization and increasing disposable incomes that have increased spending in the construction sector. As a result, governments of various countries are also extensively investing in the infrastructural developments that have escalated the demand for aggregates. Aggregates are utilized for renovating, reinforcing, and reshaping existing buildings, roads, highways, rail links, and water and sewage facilities. Besides this, the advancements in aggregate manufacturing technologies have enabled manufacturers to develop sustainable and environment-friendly variants with recycled aggregates to minimize environmental impact. These factors are expected to provide a positive thrust on the market growth in the coming years. Looking forward, IMARC Group

expects the market to exhibit moderate growth during 2021-2026.
