

Single-Use Bioprocessing Market Growth Rate at CAGR of 12% During 2021-2026

SHERIDAN, ALABAMA, UNITED STATES, October 21, 2021 /EINPresswire.com/ -- According to the latest report by IMARC Group, titled "[Single-Use Bioprocessing Market](#): Global Industry Trends, Share, Size, Growth, Opportunity and Forecast 2021-2026," the global single-use bioprocessing market size exhibited strong growth during 2015-2020. Looking forward, IMARC Group expects the global single-use bioprocessing market to grow at a CAGR of around 12% during 2021-2026.

Single-Use Bioprocessing Market

Single-Use Bioprocessing currently represents one of the rapidly evolving technologies in the pharmaceutical industry. It has completely revolutionized the upstream and downstream processes in the manufacturing of biological products. Some of the benefits offered by single-use bioprocessing technology include saving time, easy disposal, increased productivity and reduced risk of cross-contamination. Apart from this, it helps in minimizing the costs associated with complicated steps, such as cleaning, sterilization and maintenance.

As the novel coronavirus (COVID-19) crisis takes over the world, we are continuously tracking the changes in the markets, as well as the purchase behaviors of the consumers globally—our estimates about the latest market trends and forecast values after considering the impact of this pandemic. These observations will be integrated into the report.

Global Single-Use Bioprocessing Market Trends:

At present, there is a rise in the demand for single-use products that are manufactured using high-grade polymer materials and plastic composites as they provide integral strength and help in minimizing the overall operational costs. Besides this, they also ensure continuity in

biomanufacturing, which is further propelling the Single-Use Bioprocessing market growth. Furthermore, major industry participants are participating in merger and acquisition (M&A) activities to strengthen their position in the market. For instance, Danaher Corporation entered the Single-Use Bioprocessing business by acquiring Pall Corporation (US) in 2015. Key industry players are also incorporating technological advancements, such as automation, and big data and machine learning (ML) solutions in bioprocessing, to develop analytical models for predicting errors and improving accuracy during medical procedures.

Global Single-Use Bioprocessing Market 2021-2026 Analysis and Key Market Segmentation:

Competitive Landscape With Key Players :

Applikon Biotechnology BV
Boehringer Ingelheim International GmbH
Cesco Bioengineering Co. Ltd., Corning Inc.
Danaher Corporation, Entegris, Inc.
Eppendorf AG, Finesse Solutions, Inc.
General Electric (GE) Company
Infors AG
Merck KGaA,
Rentschler Biopharma SE
Sartorius AG
Thermo Fisher Scientific Inc. and 3M Company.

Market Breakup by Product Type:

Media Bags and Containers
Filtration Assemblies
Single-Use Bioreactors
Disposable Mixers
Others

Market Breakup by Application:

Filtration
Storage
Cell Culture
Mixing
Purification

Market Breakup by End-Use:

Upstream

Fermentation

Downstream

Market Breakup by End-User:

Biopharmaceutical Manufacturers

Life Science R&D

Others

Market Breakup by Region:

Europe

Asia Pacific

North America

Latin America

Middle East and Africa

Key Highlights of the Report:

Market Performance (2015-2020)

Market Outlook (2021- 2026)

Porter's Five Forces Analysis

Market Drivers and Success Factors

SWOT Analysis

Value Chain

Comprehensive Mapping of the Competitive Landscape

About Us:

IMARC Group is a leading market research company that offers management strategy and market research worldwide. We partner with clients in all sectors and regions to identify their highest-value opportunities, address their most critical challenges, and transform their businesses.

IMARC's information products include major market, scientific, economic and technological developments for business leaders in pharmaceutical, industrial, and high technology organizations. Market forecasts and industry analysis for biotechnology, advanced materials, pharmaceuticals, food and beverage, travel and tourism, nanotechnology and novel processing methods are at the top of the company's expertise.
