

# Optical Fibers in Endoscopy Market 2021: Explore Key Factors that Will Boost the Global Growth by 2030

PORTLAND, OR, UNITED STATES, October 21, 2021 /EINPresswire.com/ -- Optical fibers in endoscope are narrow tubes of fibers, which is used to transmit light into the patient's body. Growth in geriatric population susceptible to gastrointestinal conditions, rise in prevalence of cancer, and rise in adoption of endoscopy due to several benefits such as it reduces the risk of complications are expected to drive the growth of the global optical fibers in endoscopy market. However, the problems associated with their use such as risk of attenuation and dispersion are expected to restrain the market growth.

"Optical Fibers in Endoscopy Market by Material and Type: Global Opportunity Analysis and Industry Forecast, 2017-2023," the optical fibers in endoscopy systems was valued at \$796 million in 2016, and is projected to reach \$1,185 million by 2023, growing at a CAGR of 5.8% from 2017 to 2023. Glass optical fibers in endoscopy segment held more than four-fifths share of the total market in 2016.

The major factors that contribute to the growth of the market include rise in geriatric population, which is at a higher risk of diseases such as orthopedic diseases, gastrointestinal conditions, ophthalmic diseases, GI cancer, and others. Moreover, rise in adoption of endoscopy due to several benefits such as reduction of risk of complications, minimal scarring, and reduced hospital stays boost the market for endoscopy, which in turn stimulates the use of optical fibers. However, the problems associated with their use such as risk of attenuation and dispersion are expected to restrain the market growth.

Optical fibers in endoscope are narrow tubes of fibers, used to transmit light into the patient's body. Non-coherent fiber optic bundles transmits the light to the specific area”

*Allied Market Research*

Plastic optical fibers in endoscopy segment is expected to witness the highest CAGR of 6.4% during the forecast period. This is primarily attributed to the fact that plastic optical fibers are less expensive and lighter in weight in comparison to glass optical fibers.

Glass optical fibers in flexible endoscopy generated the maximum revenue, accounting for more than four-fifths share of the global optical fibers in endoscopy market in 2016. Within the same segment, plastic fibers is estimated to exhibit the highest CAGR of 6.5% during the forecast

period.

#### KEY FINDINGS OF THE STUDY

- Glass optical fibers in endoscopy is expected to grow at a significant CAGR of 5.7%, during the analysis period.
- Plastic optical fibers in endoscopy is projected to grow at a CAGR of 6.4% during the forecast period.
- Glass optical fibers in rigid endoscopy segment contributed for more than one-fifth share in the global optical fibers in endoscopy market.
- Plastic optical fibers in flexible endoscopy is projected to grow at a CAGR of 6.5% during the forecast period.
- Plastic optical fibers in rigid endoscopy is projected to grow at a CAGR of 6.1% during the forecast period.

About Us:

Allied Market Research (AMR) is a full-service market research and business-consulting wing of Allied Analytics LLP based in Portland, Oregon. Allied Market Research provides global enterprises as well as medium and small businesses with unmatched quality of "Market Research Reports" and "Business Intelligence Solutions." AMR has a targeted view to provide business insights and consulting to assist its clients to make strategic business decisions and achieve sustainable growth in their respective market domain.

Pawan Kumar, the CEO of Allied Market Research, is leading the organization toward providing high-quality data and insights. We are in professional corporate relations with various companies and this helps us in digging out market data that helps us generate accurate research data tables and confirms utmost accuracy in our market forecasting. Each and every data presented in the reports published by us is extracted through primary interviews with top officials from leading companies of domain concerned. Our secondary data procurement methodology includes deep online and offline research and discussion with knowledgeable professionals and analysts
