

The Vice Fund (symbol: VICEX) Remains Invested in the Evolving Tobacco Industry

The FDA gave its first authorization to market a line of e-cigarettes, saying the product can help adults quit smoking.

DALLAS, TX, UNITED STATES, October 26, 2021 /EINPresswire.com/ -- Recently, the FDA authorized a popular e-cigarette brand. It is the first authorization of its kind and comes while the FDA deliberates on other e-cigarette products. [The Vice Fund](#) remains committed to investing at least 80% of its net assets from a group of vice industries that includes tobacco.

The Vice Fund invests in domestic and foreign companies engaged in the aerospace and defense industries, owners and operators of casinos and gaming facilities, manufacturers of cigarettes and other tobacco products, and brewers, distillers, vintners and producers of other alcoholic beverages. These sectors have exhibited resilient demand through economic cycles and have fundamental strengths that help explain why they've endured for centuries. (Symbol: VICEX)

Northern Lights Distributors, LLC and USA Mutual Advisors, Inc. are not affiliated.

IMPORTANT RISK INFORMATION:

Mutual fund investing involves risk; principal loss is possible. The Fund will concentrate its net assets in industries that have significant barriers to entry including the alcoholic beverages, tobacco, gaming and defense/aerospace industries, the Fund may be subject to the risks affecting those industries, including the risk that the securities of companies within those industries will underperform due to adverse economic conditions, regulatory or legislative changes or increased competition affecting those industries, more than would a fund that

invests in a wide variety of industries. The Fund invests in foreign securities which involve greater volatility and political, economic and currency risks and differences in accounting methods. The Fund invests in smaller companies, which involve additional risks, such as limited liquidity and greater volatility. Derivatives may involve certain costs and risks such as liquidity, interest rate, market, credit, management and the risk that a position could not be closed when most advantageous. Investing in derivatives could result in losing more than the amount invested. If a security sold short increases in price, the Fund may have to cover its short position at a higher price than the short sale price, resulting in a loss.
