

Remotely monitor the health of family members with TM+ Telehealth especially during this Covid-19 pandemic

Remotely monitor the health of 6 family members with TM+ Telehealth during Covid-19 pandemic, now on Kickstarter

SINGAPORE, October 22, 2021

/EINPresswire.com/ -- myHealth

Sentinel Holdings PL (mHS), a leading Telehealth company in Singapore has launched the [TM+ Telehealth](#) project for Family Caregivers on Kickstarter.

TM+ is a smart assistant for Family Caregiver to remotely monitor the health of their loved ones.

Covid-19 has affected the world, restricted physical movement, and affected the health of many.

“

Don't leave the health of your family to chance, monitor it”

Jack Ng

A tool is in need to remotely monitor the health and wellness of our loved ones while minimizing physical contact with each other. mHS is leveraging on its 10 years of medical grade telehealth service to offer a new tool for Family Caregivers to monitor the health and wellness of the loved ones remotely.

It is also widely reported that Oxygen levels may start to drop even before any symptoms of COVID-19 would appear. TM+ bundled a wireless oximeter (SPO2) to track oxygen levels and help to detect cases with “silent pneumonia”, one of the most serious consequences of COVID-19.

TM+ Telehealth is unique. TM+ Telehealth allows caregiver to monitor 6 users remotely. Family members can measure their oxygen level, blood pressure, temperature, heart rate, body weight at home, in school or anywhere else, while these data are monitored remotely by the family caregiver at work or another location. Threshold alerts could remind the family caregiver of abnormalities. These records could also help doctors in understanding the health conditions of

the monitored family members.

"We have been working on this idea (monitor the health and wellness of our loved ones remotely while we minimize physical contact with each other) since the start of the Covid-19 pandemic, it is ready to be deployed. Instead of limiting it to just Singapore, we want it to benefit more people, Kickstarter is the right platform to do this", said Jack Ng, Director and co-founder of mHS.

"Don't leave the health of your family to chance, monitor it!", added Jack.

About myHealth Sentinel Holdings PL: myHealth Sentinel is a Singapore-based, Telehealth company, founded in 2011, focusing on providing Telehealth services to hospitals, family doctors and clinics. The TM+ telehealth service is the most widely use telehealth service in Singapore with thousands of patients being monitored since 2011.

The image is a promotional graphic for the TM+ telehealth service. At the top, the TM+ logo is displayed next to the text "Remotely monitor the wellness of your loved ones, wherever you are". Below this, an illustration shows an elderly woman on the left holding a smartphone, with a red dashed line and a blue signal wave connecting it to a blood pressure monitor on a table. On the right, a hand holds a smartphone displaying the TM+ app interface, with a blue signal wave connecting it to a superhero character. Below the illustration, the text "TM+ remote monitoring of loved ones" is written. At the bottom, a hand holds a smartphone displaying the TM+ app interface, which shows a list of health metrics: Blood Pressure (111 mmHg / 77 mmHg / 66 mmHg), Temperature (36.2 °C), Body Weight (51.6 kg), and SpO2 (99.00 %). To the right of the smartphone, several medical devices are shown: a blood pressure monitor, a digital thermometer, a pulse oximeter, and a digital scale, all with the TM+ logo on them.

TM+ remote monitoring of loved ones

TM+ measures Blood Pressure, Temperature, Oxygen Level, Blood Glucose, Weight
