

Autonomous Military Weapons Global Market To Grow At Rate Of 11% Through 2025

*The Business Research Company's
Autonomous Military Weapons Global
Market Report 2021: COVID-19 Growth
And Change*

LONDON, GREATER LONDON, UK,
October 22, 2021 /EINPresswire.com/ --

According to the new market research
report 'Autonomous Military Weapons
Global Market Report 2021: COVID-19

Growth And Change' published by The Business Research Company, the [autonomous military weapons market](#) is expected to grow from \$12.21 billion in 2020 to \$13.3 billion in 2021 at a compound annual growth rate (CAGR) of 8.9%. The growth is mainly due to the companies resuming their operations and adapting to the new normal while recovering from the COVID-19 impact, which had earlier led to restrictive containment measures involving social distancing, remote working, and the closure of commercial activities that resulted in operational challenges. The market is expected to reach \$20.31 billion in 2025 at a CAGR of 11%. The ability to perform dangerous tasks with precision contributed to the growth of autonomous military weapons market.

The autonomous military weapons market consists of sales of autonomous military weapons, which when activated, search, detect, evaluate the threat, track and attack enemy targets and work based on sophisticated algorithms without further intervention by a human operator. It requires the integration of several core elements like a mobile combat platform such as drone aircraft, ship, or ground vehicle, various types of sensors to scrutinize the surroundings, processing systems to classify objects discovered by the sensors, and algorithms directing the platform to initiate attack when an allowable target is detected. The market consists of revenue generated by the companies manufacturing autonomous military weapons by the sales of these products.
