"The biomaterials market has piqued the interest of healthcare providers, owing to the wide array of biomaterials such as metallic, polymeric, ceramic, and natural types for treating a wide range of conditions and other biotechnological applications. The major factors driving the market include increase in incidence of cardiovascular, neurological, dental, and orthopedic disorders, rise in geriatric population, high demand for implantable devices, and advancement in medical technology and innovations by key players". "Increasing usage of implantable products and growing awareness of biomaterials application in emerging economies have fueled the growth of the biomaterials market".

Global biomaterials market is expected to reach \$139 billion by 2022, from \$62 billion in 2015, growing at a CAGR of 11.8% from 2016 to 2022.

Orthopedic disorder was the leading application segment in the market, followed by cardiovascular disorders and drug-delivery systems segments, cumulatively contributing about three-fourths shares of the global market. This was attributed to the high incidence of conditions characterized by degenerative symptoms and notable relief offered by the use of biomaterial-based products. Neurological disorder is an another key application area of the biomaterials market, and is expected to offer lucrative investment opportunities to market players in the near future. However, tissue engineering is projected to be the fastest growing segment due to the introduction of scaffolds, which is one of the biomaterials used in 3D printing.

Comprehensive competitive analysis and profiles of major market players, such as

Royal DSM

Wright Medical Group N.V.

Corbion N.V.

Zimmer Biomet Holdings, Inc.

Bayer AG

Carpenter Technology Corporation

Covalon Technologies Ltd.

Evonik Industries AG, BASF SE, Victrex plc., and Collagen Matrix, Inc.

Key Benefits For Stakeholders:

- The study provides an in-depth analysis of the Biomaterials Market along with the current trends and future estimations to elucidate the imminent investment pockets.
- It offers Biomaterials Market analysis from 2020 to 2030, which is expected to enable the stakeholders to capitalize on the prevailing opportunities in the market.
- A comprehensive analysis of four regions is provided to determine the prevailing opportunities.
- The profiles and growth strategies of the key players are thoroughly analyzed to understand the competitive outlook of the global Biomaterials Market growth.
