

# Smart Microwave Ovens Global Market To Grow At Rate Of 15% Through 2025

*The Business Research Company's Smart Microwave Ovens Global Market Report 2021: COVID-19 Growth And Change*

LONDON, GREATER LONDON, UK, October 22, 2021 /EINPresswire.com/ -- According to the new market research report '[Smart Microwave Ovens Global Market Report 2021: COVID-19 Growth And Change](https://www.thebusinessresearchcompany.com/sample.aspx?id=3092&type=smp)' published by The Business Research Company, the smart microwave ovens market is expected grow from \$1.81 billion in 2020 to \$2.16 billion in 2021 at a compound annual growth rate (CAGR) of 19.3%. The growth is mainly due to the companies resuming their operations and adapting to the new normal while recovering from the COVID-19 impact, which had earlier led to restrictive containment measures involving social distancing, remote working, and the closure of commercial activities that resulted in operational challenges. The market is expected to reach \$3.82 billion in 2025 at a CAGR of 15%. Manufacturers are being encouraged to produce innovative and advanced products with customer interest to accept and adopt emerging technology which is expected to drive the market growth.

Smart microwave ovens are programmed to connect to smart appliances such as phone apps, phone, smart dishwashers, smart speakers and more by which instructions to oven can be given through smart phones and without the need for manual instructions. The manufacturing of smart microwave ovens design, manufacture and market smart microwave oven with Bluetooth, Wi-Fi-enabled, near-field communication and more technologies which enables the consumer to operate the smart device from anywhere for household and business users.

With Increasing Consumer Preference For Technologically Advanced Products Is The Main Driver Of The Market

Scan-to-cook feature is a technology which makes the preparation and cooking of pre-packaged and frozen foods easier with a scan of the barcode over the package by the smart phone with the use of an associated app. The customised and recommended instructions are sent to the microwave oven with a barcode scan which results in perfection of the meals being prepared.

Smart Microwave Ovens Global Market Report 2021: COVID-19 Growth And Change

## Trends In The Global Smart Microwave Ovens Market

Scan-to-cook feature is a technology which makes the preparation and cooking of pre-packaged and frozen foods easier with a scan of the barcode over the package by the smart phone with the use of an associated app. The customised and recommended instructions are sent to the microwave oven with a barcode scan which results in perfection of the meals being prepared. In 2019, Amazon launched Alexa smart oven with Scan-to cook feature which is a combination of microwave, convection cooker, air fryer, and food warmer which works well with many pre-packaged foods those by Amazon-owned Whole Foods as well. Whirlpool introduced the first scan-to-cook technology into the market. With a busy lifestyle globally many families prefer frozen foods for meals and with the advantage of Scan-to-cook feature the user need not depend on frozen food preparation instructions which takes guesswork out of cooking and results in perfection which is expected boost the demand of smart microwave oven market.
