SHERIDAN, WYOMING, UNITED STATES, October 22, 2021
/EINPresswire.com/ -- Market Overview:

According to the latest report by IMARC Group, titled "Antibiotics Market: Global Industry Trends, Share, Size, Growth, Opportunity and Forecast 2021-2026", the global [antibiotics market size](#) exhibited moderate growth during 2015-2020. Looking forward, IMARC Group expects the global antibiotics market to grow at a CAGR of 4.5% during 2021-2026.

Antibiotics refer to the group of medicines, such as fluoroquinolone, penicillin, cephalosporin, etc., that mitigate the growth of microorganisms, prevent reproduction of parasites, and reduce serious problems of bacterial infections. They are preferably taken orally in the form of pills, liquids, tablets, and capsules. Antibiotics are also available in sprays, creams, ointments, and lotions, which are applied directly to the skin to heal specific acne and other skin diseases. Moreover, antibiotics can be delivered intravenously (IV) or through injection for severe infections.

We are regularly tracking the direct effect of COVID-19 on the market, along with the indirect influence of associated industries. These observations will be integrated into the report.

Market Trends and Drivers:

The increasing prevalence of numerous infectious diseases, such as pneumonia, malaria, AIDS, tuberculosis, etc., along with the easy availability of generic medicines, is primarily driving the global antibiotics market. Furthermore, the growing incidences of surgical procedures are also increasing the sales of antibiotics to prevent incision infection. Besides this, antibiotics are finding extensive applications in livestock farming to safeguard animal health and support food

safety. Moreover, several health organizations are entering into strategic partnerships with private companies to deliver new treatments and improve existing drugs, which is expected to further propel the global market for antibiotics in the coming years.
