

MetaMart begins looking for creators and fashion brands to sell on their NFT marketplace scheduled for Release this Fall

Suishow Inc. started accepting applications from creators to sell their products on the NFT marketplace, which specializes in virtual items.

TOKYO, TOKYO, JAPAN, October 23, 2021 /EINPresswire.com/ -- The world's first NFT marketplace specializing in virtual items (3D items) NFT marketplace released by [Suishow](#) Inc. is the world's first NFT marketplace that focuses on the future of the metaverse and deals only with 3D items. By focusing on 3D items and emphasizing the post-purchase experience, the marketplace has the following features.

(1) 3D rendering

By accepting only 3D items, we can create a UI/UX that easily conveys the quality of the item.

(2) AR view

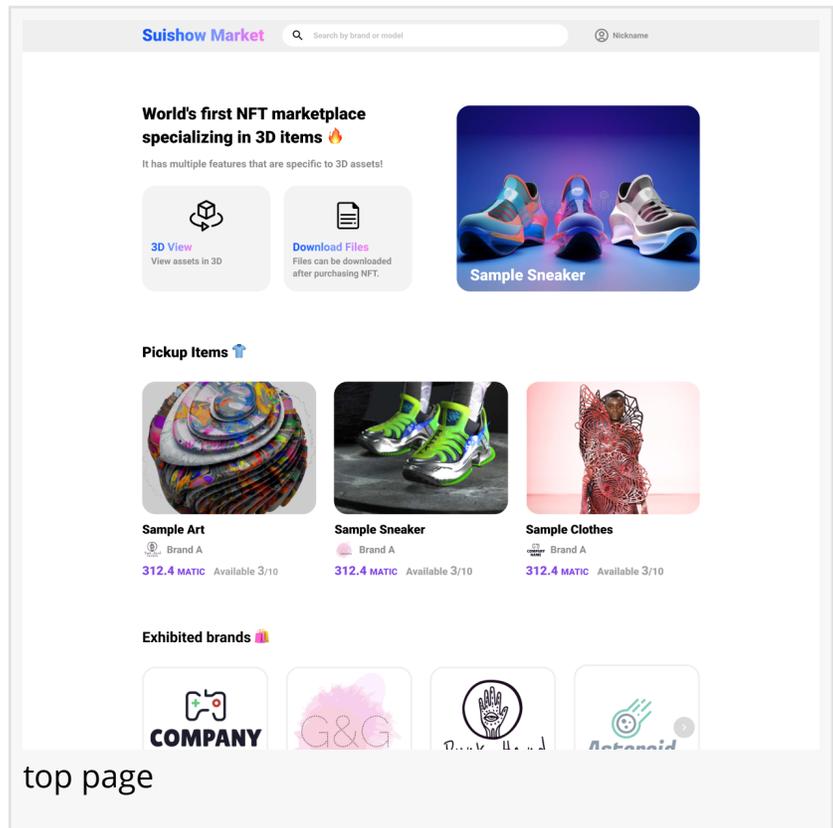

We are currently developing an app to allow users to experience reality in an augmented world after purchase.

(3) Used in VRChat and other companies' metaverse

Since 3D items can be downloaded after purchasing NFT, they can be used in other companies' metaverse such as VRChat and Roblox.

(4) Dress-up function and creating the original metaverse

We are also developing a function that allows users to use purchased 3D items to dress up their avatars and share them with others. In the future, it will be possible to interact with these

avatars in their metaverse.

5) Buying and selling 3D items from games

In the future, we plan to make it possible to buy and sell items that can be used in other companies' games.

(6) Item Review

We will conduct a screening process when creators and fashion brands register as a brand.

This will ensure the quality of brands and items in the market and maintain high quality and high prices.

Background of the service

3D items sold on current 3D item sales platforms can be easily duplicated and traded at low prices that do not match their quality.

Therefore, Suishow Inc. decided to create the concept of "owning" a 3D item by adding NFT to the 3D item, thereby maintaining the value of the 3D item.

Starts accepting artists and fashion brands

We are now accepting applications for MetaMart certified creators and fashion brands.

We are currently looking for creators who can sell their products in the market scheduled to be released in the fall.

Details

We are looking for the following creators.

□3D modelers who can create 3D models by themselves.

□Creators who create 2D illustrations, etc.

The screenshot displays the Suishow Market interface. At the top, there is a search bar labeled 'Search by brand or model' and a user profile icon labeled 'Nickname'. The main content area features a 3D model of a sneaker. Below the model, the title 'Sample Sneaker' is displayed, along with a 'Fashion Brand' label and a 'Brand Sales' section showing a price of 312.3 MATIC and 12 items. A '購入' (buy) button is visible. Below this, there is a 'Past Purchaser's Listings' section showing three listings, each with a price of 312.3 MATIC and a '購入' button. The interface also includes a 'Description' section with a warning about non-fungible items and a 'History' table with columns for 'Description', 'Formats', and 'History'. The table contains one row with a transaction hash, token standard (ERC-271), network (Polygon), and amount of tokens (20).
