

Trauma Devices Market 2021: Expeditious Growth Expected In Coming Years – Claims Allied Market Research

PORTLAND, OR, UNITED STATES, October 23, 2021 /EINPresswire.com/ -- Trauma devices are one of the various clinical procedures used for the treatment of trauma based upon the severity of injury. Trauma refers to any kind of physical injury such as fractures, dislocations, sprains & strains and burns caused by any external source. According to Center for Disease Control and Prevention, Trauma is an injury or wound to a living individual caused by due to violence or external force. These devices are used in case of fractures, especially in the long bones.

Trauma Devices Market

Increase in the aging population which is highly prone to osteoarthritic fractures, increasing incidence rate of osteoporosis and technological advancements such as use of orthobiologic products and biodegradable materials will drive the market growth in the coming years. In addition, increase in the number of road accidents, sports related injuries and changing lifestyle of the people will further drive the market growth. Recently, 42 million trauma cases were observed in U.S. which eventually increased the demand for trauma devices. However, high cost of trauma devices, allergy associated with internal fixation devices and chances of infection are expected to impede the market growth.
