2030*

LONDON, GREATER LONDON, UK,
October 27, 2021 /EINPresswire.com/ --

According to the new market research
report '[Diabetic Foods Global Market
Report 2021: COVID-19 Growth And](#)

[Change](#)' published by The Business Research Company, the diabetic foods market is expected grow from \$10.62 billion in 2020 to \$11.38 billion in 2021 at a compound annual growth rate (CAGR) of 7.2%. The growth is mainly due to the companies resuming their operations and adapting to the new normal while recovering from the COVID-19 impact, which had earlier led to restrictive containment measures involving social distancing, remote working, and the closure of commercial activities that resulted in operational challenges. The market is expected to reach \$14.94 billion in 2025 at a CAGR of 7%. Increasing cases of juvenile diabetes among children and youth is a key factor driving the growth of the diabetic foods market.

The diabetic foods market consists of sales of diabetic foods and related services that are used in supermarkets and hypermarkets, stores or pharmacies, grocery stores, and online stores. Diabetic food products are dietary products which include reduced carbohydrate content and sugar content that help regulate blood glucose increase. Diabetic food also contains low calorie sweeteners, diet beverages, etc.

Trends In The Global Diabetic Foods Market

Product innovation is the key trend in the diabetic foods market. The introduction of various items such as low-calorie sweet beverages, sugar-free jellies, diabetic bakery items, low-fat ice cream, and other dairy goods are attracting more customers towards diabetic foods. For instance, companies like Coke, Pepsi, Thumps Up and Sprite introduced new beverages such as protein shakes, good-for-good beverages and functional waters that are gradually making their
