

Food Antioxidants Market Share, High Demand, Future Scope, Recent Trends

Rising need to extend the shelf-life of food products is driving growth of the global food antioxidants market to a significant extent.

VANCOUVER, BC, CANADA, October 25, 2021 /EINPresswire.com/ -- [food antioxidants market](https://www.emergenresearch.com/request-sample/528) is expected to reach a market size of USD 3.43 Billion at a steady CAGR of 6.2% in 2028, according to latest analysis by Emergen Research. This steady revenue growth can be attributed to changing

consumer preferences, rising health and wellness concerns, and changing lifestyle. Demand for functional foods has been increasing due to rising prevalence of non-communicable diseases as a result of weakened immunity. Increasing utilization of food antioxidants for production of functional foods is expected to drive growth of the food antioxidants market during the forecast period. Growing demand for home food preservation options is another factor contributing to rising utilization of food antioxidants in food and beverage industries.

Increasing consumer preference for natural antioxidants is another factor driving market growth. Rising need to reduce spoilage and prevent deterioration and quality of meat due to microbial growth and lipid oxidation are other key factors contributing to increasing utilization of natural antioxidants across food and beverage industries. Food companies are increasingly utilizing naturally sourced antioxidants to maintain flavor and color and to extend the shelf-life of processed, fresh, cooked, and pre-cooked meats and related products.
