This newly published and insightful report sheds light on key dynamics, which are expected to transform the future of the cheddar cheese market, in turn, creating flourishing avenues for prominent companies as well as emerging players associated with the manufacturing of cheddar cheese.

According to the Fact.MR Report, global market for cheddar cheese will have soared at less than 3% CAGR, procuring a little over US\$ 38.6 Bn in value by the end of 2022.

Consumers across the globe are becoming more aware regarding their diet & health, and are significantly changing their diet plans to adopt a diet that is rich in nutrients and protein. As a result, manufacturers of cheddar cheese are attempting to make their portfolio more nutritious, following the recent growing protein trend in the food industry.

Rising consumer mindfulness regarding newer approaches towards weight reduction, anti-aging, and other wellness related issues through the utilization of normally sourced protein is convincing numerous manufacturers to offer protein-fortified products with numerous health benefits.

Global Cheddar Cheese Market: Forecast Highlights

Almost 40% of cheddar cheese produced in the world is sourced from goat milk. This trend will prevail throughout the forecast period, and the global market for cheddar cheese will also witness a gradual uptick in demand for cattle milk-sourced cheddar cheese products.

Being a refrigerator staple in the UK, Europe will continue to remain the largest market for cheddar cheese through 2022. Increasing dairy production, coupled with rising levels of nutrient deficiency among European consumers, will boost the sales of cheddar cheese in Europe throughout the forecast period.

On the other hand, the Asia-Pacific excluding Japan (APEJ) region will showcase fastest growth for cheddar cheese market. Over the forecast period, the cheddar cheese market in APEJ region will expand at more than 3% CAGR, which is relatively higher growth compared to estimates on lucrative regions such as Europe and North America.

In 2017, more than US\$ 8 Bn worth of cheddar cheese will be sold in the global market in the form of cheese blocks. As the demand for blocks of cheddar cheese rises, that of cheddar cheese sprays declines. The report distinctly projects a listless growth in sales of cheddar cheese sprays through 2022.

Cheddar cheese sold in food & beverage processing units will contribute to more than US\$ 16 Bn revenues by 2022-end. Food & beverage processing will not only be the largest application for cheddar cheese, but will also reflect a relatively speedy growth compared to revenues accounted by Horeca and household applications.

The report also projects that wholesale trade, distributor sale and direct selling will be

collectively viewed as largest sales channel for cheddar cheese, procuring more than one-third of global revenues through 2022.
