

New Start-Up Business Unit of Newsmatics Launches 1,300+ Niche Publications Under Affinity Group Publishing Brand

These new publications are a proving ground for a range of pioneering publishing models

WASHINGTON, D.C., UNITED STATES, November 4, 2021 /EINPresswire.com/ -- [Newsmatics](#) is announcing today that it has launched 1,300+ news publications within a new operating division, [Affinity Group Publishing](#). The publications, powered by Newsmatics' proprietary global news indexing systems, present structured news content from thousands of worldwide English language sources.

"These new publications are a proving ground for a range of our pioneering publishing models and there are many more to come," says David Rothstein, CEO of Newsmatics. Rothstein adds that "our publications present a unique and convenient combination of 3rd-party content and links to millions of indexed news articles from across the globe. We are developing a platform for local media innovation applicable to anyone from Boston to Bangladesh. In addition, we offer unique tools for global publishers that provide added context to the news content itself".

Each publication is dedicated to a specific topic, region, or a combination of both, such as "[Asia Pacific Herald](#)", "[US National Times](#)", "[Alternative Energy Reporter](#)", "[Global Environment Watch](#)", "[FinTech World Post](#)", "[News Break Middle East](#)", "[The Bookshelf Times](#)", or "[Crypto Times Gazette](#)". Affinity Group Publishing is using proprietary tools to populate each publication with topic-relevant and engaging news articles, applying its vast experience from creating its own world-leading newswires. Rothstein adds that "this is just a start point as we will be reaching deeper into affinity topic communities to present localized content from vetted sources. Last but

not least our plan is to start hiring local journalists to further increase the quality of our localized news content and help the community of journalists at a time when real journalism is under duress.”

Finally, Rothstein stated “we are looking into the future and experimenting with publishing models. With our groundbreaking categorization of news sources, we help our readers navigate the ever-deepening maze of bias and disinformation.”
