

Mulch Films Market Size To Reach USD 6,697.2 Million By 2028 Says Reports And Data

Rising demand for higher crop yield due to reducing arable and agricultural land are key factors driving mulch films market growth.

NEW YORK, NY, UNITED STATES, October 28, 2021 /EINPresswire.com/ --Rising demand for higher crop yield due to reducing arable and agricultural land are key factors driving mulch films market growth

The mulch films market is expected to reach a market size of USD 6,697.2 Million by 2028 and register a steady CAGR over the forecast period, according to a latest report by Reports and Data. The mulch films market is witnessing robust growth due to rising demand for higher crop yields worldwide. According to statistics released by the United Nations, the world population was 7.3 billion people in 2016 and is estimated to reach 9.7 billion by 2050. Rapidly increasing population growth and increasing purchasing power parity in developing economies is leading toward a shift in dietary habits comprising more protein intake, and this is another factor fueling global demand for food. Demand for food is expected to increase by 59% to 98% by 2050. Mulch films are widely employed to alter soil temperature, prevent moisture loss, hinder weed growth, and improve crop productivity.

Mulch films for greenhouses are used to shield plants from weather conditions such as rain and wind and to regulate internal temperatures and prevent considerable changes in temperature in greenhouses. The atmosphere inside greenhouses has high relative humidity. Use of mulch films is beneficial in the reduction of soil evaporation and improvement in the atmosphere around crops and plants.

Key market participants include The Dow Chemical Company, Novamont SPA, RKW Group, British Polythene Industries PLC, BASF SE, Armando Alvarez Group, Berry Global Inc., Ab Rani Plast Oy, AEP Industries Inc., and AL-Pack Enterprises Ltd.

Some Key Findings in the Report:

Black mulch films is the most commonly used type of mulch films owing to benefits in preventing sunlight from scorching the soil, better weed control, and preventing evaporation of groundwater. Black polypropylene mulches are used in greenhouses as weed barriers.

Metallic mulches are mostly used in orchards due to ability to prevent insects and some kinds of birds from damaging fruits and to improve sunlight reflection.

High-density polyethylene is extensively used in the production of mulch films as it is lighter and sturdier compared to low-density polyethylene of the same thickness. It offers benefits such as easy process-ability, superior chemical resistance, improved durability, and elasticity.

The customizations are available for this report and can be availed by the purchaser. The customizations can be made on the basis of the selected regions or participants.

Europe accounted for a substantially large revenue share in the global market in 2020, owing to increasing adoption of various methods to improve crop yield. Agriculture sector accounted for 1.1% of the GDP of Europe in 2018, and besides, cropland and grassland collectively account for around 39.0% of the land cover in the region.

In February 2020, Novamont announced that its product, MATER-BI bioplastic, used for production of soil-biodegradable mulch films, had received certification to comply with the AIAB Technical Means specification. The AIAB Technical Means specification intends to provide all farmers with products that are environmentally compatible and comply with ethical and technical sustainability requirements.

Key Questions Answered in this Research Study:

What is the global production, production value and consumption value?

Who are the global key manufacturers of the market? How are their operating situation?

What are the types and applications of market?

What is the market share value of each type and application?

What are the upstream raw materials and manufacturing equipment?

What is the manufacturing process?

Economic impact on the market and development trends of market.

What will be the market size and the growth rate be in 2028?

What are the key factors driving the market?

What are the key market trends impacting the growth of the market?

What are the challenges to market growth?

What are the market opportunities and threats faced by the vendors in the market?

About Us:

Reports and Data is a market research and consulting company that provides syndicated research reports, customized research reports, and consulting services. Our solutions purely focus on your purpose to locate, target and analyze consumer behavior shifts across demographics, across industries and help client's make a smarter business decision. We offer market intelligence studies ensuring relevant and fact-based research across a multiple industries including Healthcare, Technology, Chemicals, Power and Energy. We consistently update our research offerings to ensure our clients are aware about the latest trends existent in the market.
